Интеллектуальный контроллер цифрового дисплея Intelligent digital display controller

Intelligent digital display controller

Design characteristics

- 1.NYKS-X series digital display intelligent control instrument adopts the microprocessor to carry on the control operation, can carry on the extremely high precision linear correction measurement to the various nonlinear input signal, makes the measurement value display clearer and intuitionistic;
- 2.NYKG-X series optical column display intelligent control instrument integrates digital and analog, it can display digital signal and analogue signal (optical column display), which makes the display of measurement value more clear and intuitive. At the same time, it can also choose double optical column display;
- 3.The product model is many, can satisfy the spot working condition demand, the application scope is wide;
- 4.Simple structure, convenient installation and customizable design.

Parameters:

Display range:-1999~9999

Switch output: 250VAC / 3A, 24VDC / 5A

Measurement accuracy: 0.2%FS ±1 word, 0.5%FS ±1 word

Analog output: 0~ 5VAC, 0~10VDC, 0~20mA, 4~20mA

Control mode: three-bit return difference

Feed output: 24VDC/30mA

Operating environment: temperature 0 ~ +50 °C

Power supply: (85~260) VDC/AC

Input signal: thermal resistance: Pt100,Cu

Communication interface: RS-232,RS-485

Thermocouple: T,R,J,Wre3-25 B,S,K,E

Alarm mode: optional relay up and down alarm output

Standard signal: 0~375 Ω、0~75mV、0~30mV、0~5V

Set / display: panel keystroke digital settings, numerical

1~5V、0~10V、0~10mA、0~20mA、4~20mA

power loss permanent hold
